Families on the Edge (Issue 2) October 2020

Written by admin Friday, 30 October 2020 18:40 - Last Updated Friday, 30 October 2020 19:10

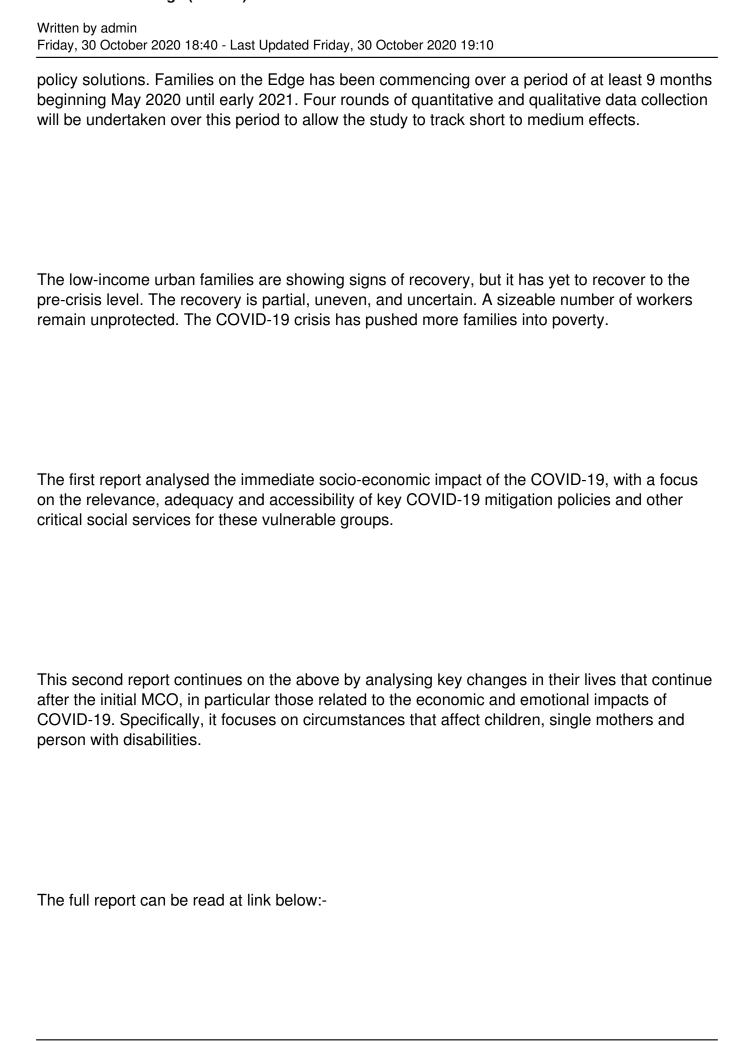

UNICEF and UNFPA jointly commissioned the Families on the Edge study to explore the impact of the COVID-19 crisis on women and children in low-income urban families in Malaysia.

This report is the second in a series of reports under the Families on the Edge project and describes the extent to which 500 families with children in Kuala Lumpur's low-cost flats have recovered from the Movement Control Order (MCO) period, which was from 18 March 2020 to 13 May 2020.

The report is meant to offer critical insights for the general public and policymakers as Malaysia aims to 'build-back-better'.

The purpose of this study is to support the Government of Malaysia's efforts to mitigate the direct and indirect impacts of COVID-19 on vulnerable groups through the generation of high-quality evidence and promotion of stakeholder dialogue on short, medium and long-term
